	Urgent	Not urgent
Important	- General register support (integers) - XMM register support (integers + floats) - SIMD support - Lexer - Parser - Generator - Type checker - Runtime - Small standard library	- YMM/ZMM register support - AVX2 - Types other than integer and float - Loops with multiprocessing - Package manager
Not Important (all of these are provided by my previous projects)	- Kernel - Allocator - SMP	- Advanced optimizer - A big standard library - Metaprogramming
